FOR IMMEDIATE RELEASE

S&S ELECTRIC EXPANDS HEADQUARTERS FACILITIES IN OLDSMAR

OLDSMAR, FLORIDA, MAY 11, 2006 – S&S Electric of Oldsmar recently completed an 18-month expansion project of their headquarters facilities, increasing the company's total amount of warehouse space and office space by 82 percent to nearly 54,000 square feet.

A newly constructed 24,000-square-foot office and warehouse facility opened on March 27, 2006, on the company's corporate campus located at 105 Douglas Road East in Oldsmar. The additions increased S&S Electric's total warehouse space by 16,500 square feet and its office space almost tripled to 12,000 square feet.

"Our new facilities will enable us to offer enhanced services to our customers," said Shawn Smith, vice president of S&S Electric. "We have expanded meeting space and a design center so that we can meet with homebuyers and present upgrade options."

The facility expansions represent an extension of S&S Electric's full-service philosophy, which focuses on being able to providing ongoing value-added maintenance and support of the systems that company installs.

"Our customers want to know that we are growing at a similar, if not quicker, pace as their own businesses," Smith said. "This facility expansion not only allow us to grow our business, but it also serves as reinforcement to our customers that S&S Electric is willing and able to keep up with industry demand."

The building boom, Smith added, has created concern industrywide about whether there will be enough personnel available to ensure that jobs are completed on time. "Builders want dependable subcontractors who can help them complete jobs on schedule," he said. "Likewise, homeowners want to start enjoying their new residences without delay. By expanding our facilities and offerings, we can ensure that qualified staff is available when needed and that people get into their homes as quickly and effortlessly as possible."

ABOUT S&S ELECTRIC

Founded in 1947, S&S Electric was named to the 2005 CE Pro 100, a listing of the largest home technology installation businesses in North America. The company was also named to the 2005 CE Pro Top 30 Structured Wiring Dealers in North America.
